THE PAIN POINT

This is you right now:

- Prospect security questionnaire killed a deal
- Not sure if you're HIPAA compliant
- Audit is coming — nothing is documented
- OCR fine headlines hit different lately

01 · SENTICIT RADAR™ · COMPLIANCE READINESS ASSESSMENT

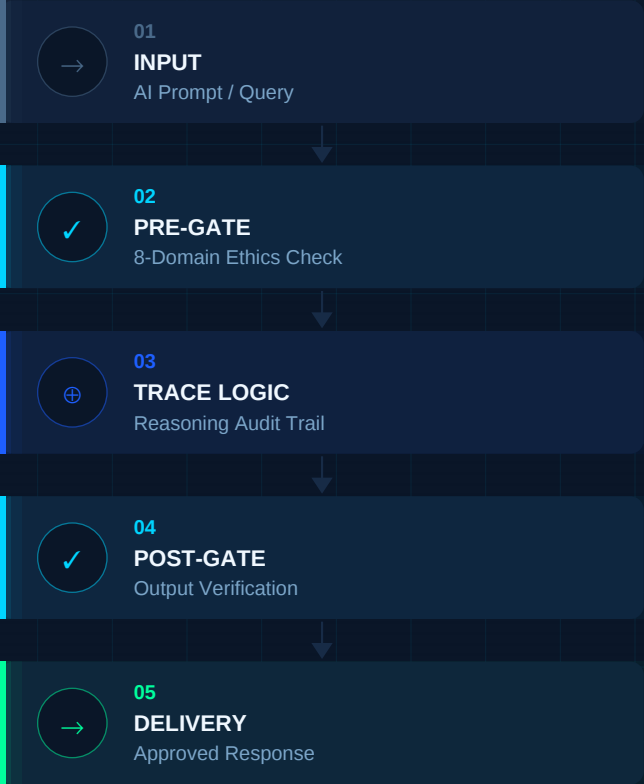

Enterprise deals don't stall because you're not good enough. They stall because you can't prove it on paper.

58% of all HIPAA breaches involve small and mid-sized businesses. Most had no documented compliance posture — and found out the hard way. — HHS OCR

HOW RADAR™ CLOSES THE GAP

Scores your risk across 8 domains — in 15 minutes
Security, infrastructure, operations, AI governance, compliance, vendor risk, data, and policy. Know exactly where the gaps are before an auditor or enterprise buyer finds them.

Prioritized remediation roadmap — not a 200-item dump
SMBs regularly park evidence below the line?
01996 top gaps ranked by HHS and agency: A plan your team can actually
BY SecurityInsights.com High Evidence: Able to handle single point of contact
better organized security and insurance department assessment, persistent value

COVERAGE METRICS

THE RISK

Deploying AI without this:

- No audit trail when a regulator asks "how?"
- Bias undetected until it's in a lawsuit
- Silent model drift degrades output quality
- One bad inference voids your compliance

VANGUARD+

03 · AI INTEGRITY ENGINE™ · OVERSIGHT INFRASTRUCTURE

Your team is deploying AI.
Nobody is watching what
it actually does.

77% of SMBs use AI tools with zero governance layer.

One non-compliant inference can trigger regulatory review, fines, or litigation.

WHAT INTEGRITY ENGINE DOES

Trace Logic — full audit trail per inference

Every AI inference logged with complete reasoning chain. When a regulator asks "how did your AI reach that decision?" — you have the answer in seconds, not weeks of reconstruction.

Continuous Ethics & Compliance Governance (Senticite bridge)

Plan this strategy, deploy it in the city of origin. Engines with this capability detect daily shifts in model drift, bias, and model drift. Build checks into your AI lifecycle compliance.

THE HEALTHCARE RISK

Healthcare AI without Slant™:

- Surveyors ask about AI — you have no answer
- Bias in clinical AI goes undetected for months
- Accreditation body asks — you scramble

VANGUARD+ · HEALTHCARE

**Your clinicians trust AI.
Your surveyors are about
to ask whether they should.**

ACR, IAC & TJC now require documented AI governance.

Bias detection across patient subgroups

Continuous monitoring for demographic, age, and condition-based bias in clinical AI outputs. Catch disparity before it becomes patient harm — or a surveyor finding that voids your accreditation.

04 · AI OPTIMISM ENGINE™ · FORWARD-LOOKING AI MOMENTUM SCORE

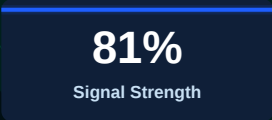

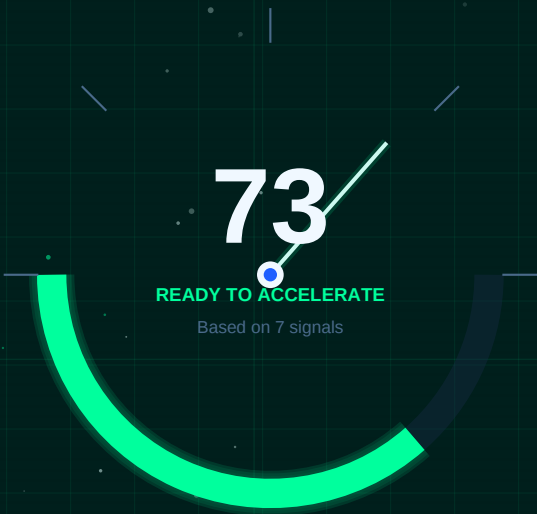

Most SMBs don't know if AI will help them.

So they do nothing. Or the wrong thing.

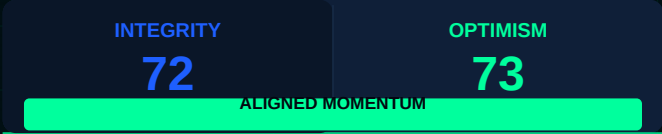

67% of SMB leaders cite "not knowing where to start" as their #1 AI blocker.
Optimism Engine eliminates that in 3 minutes.

WHAT OPTIMISM ENGINE DOES

AI Optimism Index — scored in 3 minutes
Seven signals map your AI readiness, momentum, and self-awareness into a 0–100 index with a named band — from Stabilize First to High Momentum. Specific to you, not a template.

TENSION RESOLVER™

IS THIS YOU? · 6 SIGNS YOUR BUSINESS HAS OUTGROWN DIY COMPLIANCE

01 You're the IT decision-maker by default

CEO/COO/office manager fielding vendor calls and guessing at security budgets with no strategy behind the decisions.

02 A breach would be an existential event

IBM: avg SMB breach costs \$4.88M. One phishing email from regulatory fines, lawsuits, and headlines.

03 Compliance deadlines keep surprising you

HIPAA audits, SOC 2 renewals, cyber-insurance questionnaires land with no plan, no owner, no documentation.

04 Enterprise deals stall at security review

Prospect loved the demo. Their security team sent a questionnaire. That was six weeks ago.

05 Your AI has no governance layer

Staff use AI tools daily. No audit trail. No bias monitoring. No answer when a regulator asks.

06 You can't answer "who owns this?"

When a breach, audit, or compliance question lands, there's no named executive. Just panic.

MOST POPULAR

SENTINEL

\$2,500 /mo

Audit-Ready Baseline

Pass your first compliance audit. Answer enterprise security questionnaires. Build a defensible security posture.

- Radar™ full portal
- Optimism Engine full
- Senticit Intelligence Score
- Evidence Room + auditor share
- Named CISO
- 1 framework, audit-ready
- Monthly cadence

VANGUARD

\$5,500 /mo

Compliance as Competitive Moat

Enterprise deals close faster when you can answer every security question with a named CISO on the call.

- Everything in Sentinel
- AI Integrity Engine™
- Slant™ (healthcare)
- Up to 3 frameworks
- Board-ready reporting
- Bi-weekly cadence
- AI governance

COMMAND

\$10,000 /mo

Board-Ready & M&A-Ready

Say yes to things that used to require a \$450K executive you can't justify — without the bench cost.

- Everything in Vanguard
- Unlimited frameworks
- Named CTO + CISO
- M&A & investor diligence
- Full sales engineering
- Weekly + async
- White-label
